

**Spine Center Würzburg - Medical Care Center for Neurosurgery and Rehabilitative Medicine  
Certified by the Specifications of the German Spine Society (DWG)  
Center for integrated Spine Treatment in the Medical Center Schweinfurter Straße 1 in Würzburg**

Dear Patient!

The informations below are intended to give you an overview on our treatment options and how to meet us.

In back pain, disc herniations and other diseases of the spine an holistic view on the patient is needed. Besides detailed consultation we offer the whole range of contemporary diagnostic clarification and therapy.

We are a team consisting of Neurosurgeons and consultants in Rehabilitative and Physical Medicine with a focus on conservative and operative treatment of the degenerative spine. Furthermore we offer the treatment of most peripheral nerve compression syndromes. The treatment options of Rehabilitative Medicine include manual medicine, osteopathy, special pain therapy and acupuncture not only of the spine.

### **Our treatment options**

#### **Conservative medicine**

- Pain therapy for in- and outpatients
- Multimodal pain therapy
- Facet joint infiltrations
- SI-Joint infiltrations
- Periradicular infiltrations
- Peridural infiltrations
- Thermodenervations
- Psychosomatic basic care
- Manual medicine
- Osteopathy
- Manual medicine and osteopathy in infants and toddlers
- Acupuncture
- Case management in neurosurgical rehabilitation
- Ultrasound diagnostic of the musculoskeletal system
- Diagnostics and therapy in food intolerances and disorders of the intestinal microecology

#### **Operative medicine**

- Minimal invasive intradiscal treatment (nucleoplasty)
- Endoscopic spine surgery
- Microscopic spine surgery in disc herniations of the cervical, thoracic and lumbar spine
- Microscopic spine surgery in spinal stenosis of the cervical, thoracic and lumbar spine
- Fusion Surgery in instabilities, spondylolisthesis and disc degenerations of the cervical, thoracic and lumbar spine
- Disc arthroplasty
- Anular prothesis (Barricaid)
- Fusion procedures of the SI-joint (I-Fuse)
- Microsurgery of spine and peripheral nerve tumors
- Kyphoplasty
- Posterior minimally invasive fusion surgery of the cervical spine (DTRAX)
- Spinal Chord Stimulation (SCS)
- Subcutaneous Pain Stimulation (SPNF)

- Intrathecal pain therapy
- Operations in peripheral nerve compression syndromes
